# ABHAY SHARMA

Madhu Nagar, Agra Cantt, Agra, Uttar Pradesh – 282001
+916396023374 — abhaypandit128@gmail.com — LinkedIn — GitHub — Portfolio

## Professional Summary

B.Tech graduate in Electronics and Communication Engineering with strong interest in Software Development, Python, Backend Development, REST APIs, and FastAPI. Skilled in building software solutions, AI-powered applications, and management systems through academic, freelance, and personal projects. Strong foundation in Data Structures, Algorithms, OOPs, databases, and problem-solving, with a passion for learning modern technologies and building scalable applications.

## Technical Skills

- **Programming Languages:** Python, Java, C, C++
- **Backend Development:** Flask, FastAPI, Django, REST APIs, SQLAlchemy, asyncio, Multithreading
- **Bots & Integrations:** Telegram Bot API (Pyrogram, python-telegram-bot), Third-Party APIs, FFmpeg
- **Frontend Development:** HTML5, CSS3, JavaScript (ES6), Jinja2 Templates, Responsive Design
- **Databases:** SQL, MySQL, PostgreSQL, SQLite, Supabase, Neon
- **Cloud & DevOps:** Docker, Railway, Render, GitHub Actions (CI/CD), Git, GitHub, VS Code
- **Security Practices:** CSRF Protection, SSRF-Safe URL Validation, Rate Limiting, Token Hashing
- **Core Concepts:** Data Structures, Algorithms, OOPs, DBMS, Job Queues and Scheduling
- **Coding Platforms:** LeetCode, HackerRank

## Experience

**Freelance Software Developer** Nov 2025 – Dec 2025

- Developed software solutions for inventory management, billing, and data handling requirements.
- Implemented backend functionality, database integration, and application enhancements.

## Internship

**ADRDE, DRDO Agra** Jun 2025 – Jul 2025

- Enhanced analytical, troubleshooting, and system optimization skills through technical problem-solving and process improvement in a professional R&D environment.

## Projects

**MediaForge – Media Download, Conversion & File-Sharing Platform** Python, Flask, PostgreSQL, Docker

- Built a responsive web app (dark/light theme) and button-driven Telegram bot on one shared Python core: download media from 11 platforms with quality and size previews, convert video, audio and images, create expiring share links, with live progress, queue positions, email-verified accounts, history, and tiered daily quotas shared across web and Telegram.
- Engineered a custom priority job scheduler with lanes, disk-space reservations, and typed plain-language errors. Secured with SSRF-safe URL validation, CSRF protection, rate limiting, and hashed tokens; added an admin console with audit trail, backups, health endpoints, and Docker CI/CD (Railway, Neon).

**MoviezNagar – Telegram Bot Platform with Membership Tiers & Admin Dashboard** Python, Pyrogram, Flask, Supabase

- Built an asynchronous Telegram bot with inline-button menus, paginated search, request tracking, suggestion and bug reporting with cooldowns, and time-limited membership tiers unlocked via one-time per-user verification tokens, with provider health checks and fallback.
- Developed admin tools for access grants, usage stats, activity logs, maintenance mode, and Excel exports, plus scheduled cleanup, uptime monitoring, and SQLite-to-Supabase sync with monthly archival and restore.

## Education

**Bachelor of Technology (Electronics and Communication Engineering)**
Raja Balwant Singh Engineering Technical Campus, Agra 2022 – 2026 — 64.85%

**Intermediate (CBSE)** – Kendriya Vidyalaya No. 3, Agra 2021 — 72.3%

**High School (CBSE)** – Kendriya Vidyalaya No. 3, Agra 2018 — 73.4%

## Certifications

**Industrial Training / Certification** – ADRDE, DRDO Jun 2026
Assisted in technical documentation and analyzed software/hardware protocols for defense-related aerodynamic systems.

**Technology Job Simulation** – Deloitte Australia (via Forage) Jun 2026
Built Python integration scripts for nested IIoT JSON telemetry data and drafted software proposal layouts.

## Soft Skills

**Adaptability** — **Quick Learning** — **Problem Solving** — **Team Collaboration** — **Communication**
